

Banjo[®]

EMR for Addiction Treatment Centers

FOR TELEHEALTH, OBOTS, DETOX, RESIDENTIAL & IOP

- A secure cloud based intake and management solution for addiction treatment centers, developed with guidance from industry leaders.
- The only addiction solution that mirrors your process for better outcomes.
- HIPAA compliant with a multitude of audit features to ensure compliance.

We've heard all the excuses with drug rehab EMR's:

"The functionality is limited; it's not built for a wide spectrum of practices."

"They often say a function is coming in the next couple of months, but still isn't available after 18 months."

"The customer support is not as well-versed in the software as they should be."

"I can't make the customized reports that I need."

"I've lost my patient record(s)."

Banjo is integration friendly and affordable. Banjo is customizable for your business. Your business does not need to conform to the software.

Banjo[®] for Addiction Treatment Centers

It's all in the connections, the complex data integration we make simple. Banjo is the only EMR that has all your integration needs fully covered. Its fully connected with various products and there are no hidden fees.

Does your addiction treatment center have any of the following business goals?

- We want better outcomes for our patients
- We want to be paid accurately & faster
- We want to improve our business process efficiency
- We want to expand and add more facilities
- We want to be better equipped for an insurance audit
- We want to connect our business of information on one platform so that everything works seamlessly
- We want world class reporting that is easy and customizable
- We want to lower our billing costs
- Integrate Call Tracking and Leads into the CRM and EMR

If some, or any of these goals are yours, then you owe it to yourself to at least take a demo look at Banjo. We think you will like what you see. If you don't like your current EMR environment or think it has some limitations give us a call and we can arrange a demonstration.

If you are a 2-4-person doctor's office treating behavioral health patients, or if you are a multibillion-dollar company with 10's of thousands of employees, we can provide value to businesses for all sizes in the addiction treatment field.

Training and getting up to speed is easy. We say this because the core technology we are leveraging has billions invested into the user interface.

Why pay 1000's of dollars to get specialized integrators when its already done for you? Make your office truly digitized without the high cost — that future is achievable now! Improve your business and patient care by becoming fully connected without the high cost of doing so.

Talk to us today to make the difference. We want to make you truly digitized without the high cost involved. The only behavioral health solution that is truly connected and makes your office completely digitized.

Why Banjo?

- ASAM 6 dimension fully supported
- Robust custom and flexible reports only by clicks
- Salesforce CRM fully integrated with the EMR
- Artificial Intelligence that identifies the quality of care
- Add any forms as needed
- No hidden costs
- Scalable and affordable for 2 person practice to 40,000 person rehab
